- Portfolio: [Amber Peña | Business Technology Solutions](#)
- (832) 762-1232
- Houston, TX

CORE COMPETENCIES

Business & Strategy

- Business Analysis
- Requirements Gathering
- Process Improvement
- Process Mapping
- User Stories
- Agile Methodologies
- SDLC
- Stakeholder Communication

Data & Technology

- Python
- SQL
- Excel
- Git/GitHub
- Figma
- VS Code
- HTML
- CSS
- JavaScript

Enterprise Systems

- IBM FileNet
- Engineering Documentation
- Enterprise Records Management
- PCTS
- Pulse

Amber Pena

BUSINESS TECHNOLOGY ANALYST | AI & AUTOMATION | ENTERPRISE SYSTEMS | COMPUTER SCIENCE STUDENT

Business technology professional with experience supporting enterprise engineering systems within the energy industry. Skilled in business process analysis, enterprise applications, data validation, workflow improvement, and cross-functional collaboration. Currently pursuing a B.S. in Computer Science while building expertise in business analysis, AI-powered solutions, data analytics, and product strategy. Passionate about solving operational challenges through technology and creating user-centered solutions that improve business performance.

PROFESSIONAL EXPERIENCE

ENERGY TRANSFER | 1300 MAIN ST. HOUSTON, TX 77002

April 2025 - Present

Enterprise Systems & Engineering Operations

- Support enterprise systems used across natural gas operations by validating engineering documentation and maintaining high-quality technical records.
- Analyze operational and engineering data to improve data integrity across enterprise applications.
- Partner with engineers, project managers, and business stakeholders to locate and validate documentation supporting capital and maintenance projects.
- Troubleshoot enterprise application issues and improve user workflows.
- Train employees in enterprise systems and documentation standards to improve adoption and consistency.
- Identify workflow inefficiencies and recommend process improvements supporting engineering operations.

PROJECTS

Clean Slate AI Customer Experience Platform
Founder & Product Lead

EDUCATION

UNIVERSITY OF HOUSTON-DOWNTOWN (Expected Graduation: Spring 2027)

Bachelor's in computer science (In Progress)

Relevant Coursework:

- Programming Fundamentals (Python)
- Data Structures & Algorithms
- Systems Analysis & Design
- Information Technology Fundamentals

- Conduct customer research and analyze purchasing behavior to improve customer experience.
- Design AI-assisted ordering concepts and customer workflows.
- Create wireframes and product prototypes in Figma.
- Build partnerships with local businesses through community outreach.
- Translating customer feedback into product improvements

Natural Gas Market Intelligence Dashboard Overview

- Designed a dashboard concept to help natural gas analysts monitor key markets and operational data in a single location. The project focuses on transforming complex datasets into clear, actionable insights that support faster business decisions.

Responsibilities

- Researched common metrics used in natural gas market analysis and energy operations.
- Designed dashboard wireframes to display production trends, pricing data, pipeline activity, and operational KPIs.
- Cleaned and organized sample datasets using Python and Excel for analysis.
- Created visualizations to highlight trends, anomalies, and performance indicators.
- Applied business analysis techniques to determine which metrics would provide the greatest value to stakeholders.
- Documented business requirements and proposed future AI-powered forecasting capabilities.

Tools

- Python
- Excel
- Power BI
- Figma
- GitHub

Portfolio Website:

- Designed and developed a fully responsive professional portfolio using HTML, CSS, and JavaScript.
- Established a cohesive personal brand focused on business technology, AI, and enterprise systems.
- Applied UX principles, responsive layouts and modern web design techniques.
